

CNet Training Legacy Statement

CNet Training, an Uptime Education company, is committed to building a legacy for the digital infrastructure industry.

As CEO of CNet Training, global leading provider of technical education for the digital infrastructure industry, I firmly believe that leaving a legacy is very important. CNet is committed to building a legacy of sustained quality technical education leading to a more confident and stronger future for the industry.

As an industry, we have a duty of care to invest in the industry, to make it the best we can, and to leave it stronger and more sustainable for the next generation. Developing and enhancing the skills and knowledge of your teams increases the quality of delivery and workmanship and therefore helps to mitigate human risk within mission critical facilities. By developing a strong, diverse, ethical, and sustainable industry, we can build a legacy and create opportunities for businesses and individuals to thrive and support the wider society.

CNet's commitment:

- ▶ CNet will continue to work closely with leading organizations to design and deliver sustained quality technical education programs and knowledge progression pathways that meet the needs of the digital infrastructure industry, encompassing the network infrastructure and data center sectors
- ▶ CNet will continue to encourage organizations to commit to self-regulating their teams with industry recognized credentials that will, in turn, establish a recognised standard of quality across the entire industry
- ▶ CNet will continue to encourage the industry to appreciate the value of education and professional development as a contributing factor to business success
- ▶ CNet will continue to strive to provide learners with a lifetime commitment to learning and continued professional development through high-quality learning that awards official accreditations, certifications and internationally recognised qualifications
- ▶ CNet will continue to provide learners with even more convenience and new ways of learning to enhance the entire learning experience for customers to enhance the entire learning experience for customers
- ▶ CNet will ensure its employees are ambassadors for the digital infrastructure industry, raising awareness of the importance and value of STEM skills, and working to inspire the next generation to consider and choose careers in the industry
- ▶ CNet will support and encourage sustainability and efficiency by educating individuals to create business strategies that consider sustainability and the environment, and in turn, elevate the way the industry plans, designs, implements, manages, and analyzes mission critical facilities
